High Precision Fitment Checking Models

Printed model

Fitment checking

Product used: Model Pro Resin

About The case

The lab want to test the fitment of the milled zirconia crowns before delivering to the doctor, so they decided to print the Fitment Model and check the fitting of the Zirconia crowns.

Outcome & Lab's Comment

The fitment model was printed with DTech Model Pro resin which is best suited for C&B fitment checking & High precision models with removable dies. The model printed perfectly without any shrinkage or fitting Issues and the milled C&B provided the accurate fit on model without any adjustment.
