3D Printed Stackable Guides

Product used : Surgical Guide & C&B

About The case

3D printed stackable guides using D Tech SG resin & Accuprint C&B resin to give an immediate prosthesis post implant surgery.

Outcome & Doctor's Comment

Stackable dental implant guide system is a modular solution that streamlines implant placement . This guide allows for precise step by step assembly and enhanced patient outcomes. Immediate provisionals in stackable dental guides refers to temporary restorations that are placed immediately after dental implant placement. These provional restorations are designed to minic the final prosthesis and aid in maintaining the shape, contour and function of the patient's teeth while the permanent restoration is being fabricated.

In this case C&B Accuprint resin was used in this case with metal reinforcement.
